---

Education

National University of Science & Technology *November 2021 – June 2025*

Bachelor's in Computer Science

Coursework: Data structures & Algorithms, Design & Analysis of Algorithms, Object Oriented Programming, Database Management Systems, Web Engineering, Operating Systems, Digital Image Processing, Artificial Intelligence, Computer Networks, Big Data Analytics, Parallel & Distributed Computing, Information Security etc.

Work Experience

VendorPot *January 2025 – Present*

Software Engineer

- Served in a senior engineering capacity on VendorPot, driving full-stack development and security architecture for an AI-powered B2B procurement marketplace serving the GCC.
- Built and scaled product features with Next.js, NestJS, Supabase, Google Cloud, and Cloudflare in a secure multi-tenant SaaS environment.
- Led implementation of application and platform security controls including RLS, WAF protection, API hardening, rate limiting, secure sessions, and tenant-aware authorization.
- Contributed to GRC and compliance-aligned security practices by defining policies, reviewing controls, testing APIs, preparing SLA-related documentation, and aligning platform security with GCC market expectations.

Data Pulse Technologies *June 2024 – January 2026*

Full Stack Developer

- Led development of AG Property Manager, a large-scale property management system in collaboration with a European client; implemented core modules, managed Nginx server, and optimized a high-volume production database.
- Enhanced LocumSmart, a medical platform; deployed via cPanel and added critical features.
- Contributed to full-stack development across projects using Go, Next.js, and Spring Boot.
- Integrated secure and scalable payment solutions across multiple platforms.

Zikra Infotech LLC *January 2024 – June 2024*

Junior Full Stack Developer

- Developed email outreach and lead management modules for an international scale Business Management tool Z360.
- Specialized in Laravel with React and Inertia.js to build and optimize performant web applications.

Al Raheem Technologies, NSTP, NUST *August 2023 – September 2023*

Angular Intern

- Collaborated on a Middle Eastern client's website, focusing on front-end development using the MEAN stack.
- Built responsive, user-centric interfaces with Angular.

Projects

FYP – Psychology Application – Our FYP was a flagship project at NUST. The tech stack consists of Django and Django Channels along with PostgreSQL and Redis at Backend and Next.js on Frontend for CSR.A Llama model is also being integrated into the application. It's a psychology application to connect patients and psychologists streamlining the whole process.

Laravel Stack Psychology Application – An application where a user can either register to get help based on his/her mental problems or can help other users by forming support groups or giving relevant online helping material.

MERN Stack Posts Application – This project is a CRUD posts application with frontend in react.js and backend in node.js with MongoDB atlas cluster database. A user can write a post, update it, and delete it.

PHP CRUD Library Management System – A Library Management System with a complete frontend in HTML/CSS/JS and backend in PHP connected to MySQL database. A user can issue and return a book from a given record.

Skills

Frameworks: Django, Laravel, Spring Boot, Golang, Node.js, Express.js, Nest.js
Frontend: React.js, Next.js, Inertia.js, TailwindCSS, Material-UI, Bootstrap
Databases: Supabase, PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch
Cloud & DevOps: Google Cloud Platform, Cloudflare, Docker, Git, GitHub, Postman, Linux
Security: SaaS Security, API Security, Row-Level Security (RLS), RBAC, ABAC, IAM, WAF, DDoS Protection, Secure Session Management, Rate Limiting, Encryption in Transit, Encryption at Rest
Architecture: Multi-tenant SaaS, Microservices, RESTful APIs, CI/CD
